Sec. OD Top: 12 1/2"

Sec OD Bottom: 15"

New price: \$4,169.95 (HRO Web Price) This item must be delivered by truck freight, truck freight charges will apply.

US Tower's freestanding TX Series crank-up towers are as strong or stronger than most competitors' heavy-duty models. The TX Series towers have 21 foot sections with 4 foot overlap to provide extra height and strength. In addition, the overlap helps prevent binding while lowering your tower in high wind conditions.

US Tower's TX Series requires no guying. The wind loading is calculated at 90 mph winds per TIA/EIA specifications. To assist you in applying for necessary construction permits, IBC 2006 calculations are available for most models.

The TX Series towers have a large enough top section (12½") to permit installation of most rotors inside the section for maximum strength while allowing the section to fully retract. Cross-bracing at critical points on the tower ensure safety and additional strength. All US Tower crank-up towers have a heavy-duty hot dipped galvanized finish both inside and out, which should provide many years of trouble-free service.

All T-bases will accept the TRX Series raising fixtures for easy one-man installation. All TX Series towers include Fulton hand winches which feature automatic load actuated brakes for maximum safety. Masts and motor drives are available as accessories (see accessory page).

US Tower's TX Series requires no guying. The wind loading is calculated at 90 mph winds per TIA/EIA specifications. To assist you in applying for necessary construction permits, IBC 2006 calculations are available.

US TOWER TRX-80 Tower Raising Winch

Standard model tower raising fixture for TMM, TX and HDX Series towers. Both TRX-80 and 80HD are designed to be easily mounted on your towers' hinged T-base for quick and safe one man installation or antenna servicing.
